PROFESSIONAL SUMMARY

Frontend Lead and product-minded developer with 4+ years of experience building scalable web apps that look as good as they work. Specialised in Next.js, React, and TypeScript, with a strong design sensibility spanning typography, color systems, and interaction design. Track record of measurable impact: 20% faster dev cycles, 30%+ team efficiency gains, and 40%+ SEO/load speed improvements. Currently leading frontend at NEXTech, Bangalore, driving AI-assisted workflows and full-stack delivery.

CORE COMPETENCIES

Next.js

React.js

TypeScript

Node.js

UI/UX Design

Figma

Team Leadership

AI-assisted Workflows

SSR / SSG

Firebase

MongoDB

AWS EC2

GitHub Actions

Web3 / Blockchain

WORK EXPERIENCE

NEXTech

Jun 2025 - Present

Frontend Lead

Bangalore, India

- Leading the frontend team, owning architectural decisions, code reviews, and delivery across the product.
- Spearheaded the team's transition to an AI-assisted development workflow, introducing structured documentation practices (markdown-based specs, prompts, and context files) that accelerated feature delivery.
- Expanded scope into full-stack development - now shipping backend features alongside frontend, enabled by AI-augmented engineering.

LegalForce

Mar 2023 - May 2025

Frontend Developer II

Hyderabad, India

- Oversaw development of modular, reusable React components, reducing development cycle time by **20%** per feature.
- Designed and implemented a Next.js starter template (fonts, hooks, utils, components, image imports, API methods), enabling near-zero time-to-deployment for future projects.
- Established best practices for scalability, maintainability, and consistency, improving team efficiency by at least **30%**.
- Engineered a custom CMS (frontend & backend) with Next.js, Node.js, and Firebase, enabling dynamic multilingual site updates across **20+ subdomains**.
- Crafted a blog system with Next.js App Router and Notion API using SSG, improving SEO and load speeds by **40%+**.
- Led code reviews and mentored junior developers on industry best practices and modern development standards.

LegalForce

Jul 2022 - Feb 2023

Frontend Developer I

Chennai, India

- Developed frontend components for a Trademark Search Engine with **12M+ trademarks**, incorporating complex filtering, SSR, and reCAPTCHA for improved security and UX.

LegalForce

Dec 2021 - Jun 2022

Frontend Developer Intern

Chennai, India

- Worked on multiple frontend projects using React, Next.js, and TypeScript.

Nonceblox

Dec 2021 - Jun 2022

Full Stack Developer Intern

Remote

- Built projects with Next.js and Node.js, contributing to blockchain-related initiatives.
- Integrated blockchain functionality using web3.js and ethers.js across various projects.

- Built backend services for a dating app with Node.js, handling user authentication and data management.

PROJECTS

Offlyn 2026

- Designed and built a full-stack dating app connecting people through mutual friends - conceived the product, designed the UI/UX, and shipped it end-to-end.
- Designed the visual identity and landing page ([offlyn.love](#)) in Next.js: custom Raleway typography, a pink/magenta accent system, floating hero animations, and a tone that balances warmth with modern minimalism.
- Built the web app ([app.offlyn.love](#)) with TanStack Start and a cross-platform React Native mobile app, currently pending App Store and Play Store approval.
- Designed the core trust mechanic: mutual friend identity stays hidden until both parties match, with phone-number-based friend graphs and full blocking support.

Equanim 2026 · Open Source

- Designed and built a declarative animation specification format where every visual property is a math expression evaluated at time t - no keyframes, just equations.
- Renderer-agnostic and AI-friendly by design: specs are pure JSON with no executable code, safe to generate with LLMs and portable across platforms.
- Supports parametric paths, ODE systems with RK4 numerical integration (e.g. double pendulum physics), and live user-controllable variables.
- Built in TypeScript with a custom expression engine (mathjs) and 279 test assertions.

slingcn - shadcn Registry 2025 · Open Source

- Published a custom shadcn/ui component registry at [shadcn.davidsling.in](#), distributing reusable React components and hooks installable directly via the shadcn CLI.
- Includes a data-command component for advanced data querying and a use-modal-control-query hook for managing modal state through URL parameters.
- Built with Next.js and TypeScript; follows the official shadcn registry v3 standard for component distribution.

EDUCATION

Vellore Institute of Technology

2018 - 2022

Bachelor of Technology in Electronics and Communication | Amaravati, AP

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS **Frameworks:** Next.js, React.js, Node.js **Databases:** SQL, Firebase, MongoDB**Tools:** GitHub Actions, AWS EC2, WebSockets **Design:** Figma, Adobe Illustrator, Adobe Photoshop**Blockchain:** Web3.js, Ethers.js, Metamask
